

Learning Activities: Intellectual Disabilities
In-Class Activity: Develop a plan of support for a child with ID in the school setting. Include ways to include the child in the development of the plan.
In-Class Activity: Identify key traits of partnering with families and brainstorm ways to work through possible challenges in the partnership.
In-Class Activity: Create a simplified flowchart or decision tree based on the diagnostic considerations listed (e.g., severity, medical history, family planning). In small groups, pulling from the case study and use the decision tree to determine: <ul style="list-style-type: none">• Whether further testing is needed• What specialists should be involved• How to communicate findings to families
